CONTENTS

193 ALVAREZ, J. B., BALLESTEROS, J., SILLERO, J. A. and MARTIN, L. M.: Tritordeum: a new crop of potential importance in the food industry

49 ANAMTHAWAT-JÓNSSON, K. and HESLOP-HARRISON, J. S.: Species specific DNA sequences in the Triticeae

167 ASAY, K. H.: Breeding potentials in perennial Triticeae grasses

71 BALDAUF, F., SCHUBERT, V. and METZLAFF, M.: Repeated DNA sequences of *Aegilops markgrafii* (Greuter) Hammer var. *markgrafii*: Cloning, sequencing and analysis of distribution in Poaceae species

1 BARKWORTH, M. E.: Taxonomy of the Triticeae: a historical perspective

199 BÖRNER, A., MELZ, G. and LENTON, J. R.: Genetical and physiological studies of gibberellic acid insensitivity in semidwarf rye

141 BOTHMER, R. VON, SEBERG, O. and JACOBSEN, N.: Genetic resources in the Triticeae

239 CEOLONI, C., DEL SIGNORE, G., ERCOLI, L. and DONINI, P.: Locating the alien chromatin segment in common wheat–*Aegilops longissima* mildew resistant transfers

315 CIAFFI, M., DOMINICI, L., LAFIANDRA, D. and PORCEDDU, E.: Seed storage proteins of wild wheat progenitors and their relationships with technological properties

163 DAMANIA, A. B., HAKIM, S. and MOUALLA, M. Y.: Evaluation of variation in *Triticum dicoccum* for wheat improvement in stress environments

55 DE PACE, C., DELRE, V., SCARASCIA MUGNOZZA, G. T., QUALSET, C. O., CREMONINI, R., FREDIANI, M. and CIONINI, P. G.: Molecular and chromosomal characterization of repeated and single-copy DNA sequences in the genome of *Dasypyrum villosum*

175 DONG, Y. S., ZHOU, R. H., XU, S. J., LI, L. H., CAUDERON, Y. and WANG, R. R.-C.: Desirable characteristics in perennial Triticeae collected in China for wheat improvement

79 D'OVIDIO, R., TANZARELLA, O. A., MASCI, S., LAFIANDRA, D. and PORCEDDU, E.: RFLP and PCR analyses at *Gli-1*, *Gli-2*, *Glu-1* and *Glu-3* loci in cultivated and wild wheats

37 DVOŘÁK, J. and ZHANG, H.-B.: Application of molecular tools for study of phylogeny of diploid and polyploid taxa in Triticeae

225 FRANKE, R., NESTROWICZ, R., SENULA, A. and STAAT, B.: Intergeneric hybrids between *Triticum aestivum* L. and wild Triticeae

15 FREDERIKSEN, S. and SEBERG, O.: Phylogenetic analysis of the Triticeae (Poaceae)

253 FUKUDA, K. and SAKAMOTO, S.: Studies on unreduced gamete formation in hybrids between tetraploid wheats and *Aegilops squarrosa* L.

93 HESLOP-HARRISON, J. S.: Molecular cytogenetics, cytology and genomic comparisons in the Triticeae

155 HODGKIN, T., ADHAM, Y. J. and POWELL, K. S.: A preliminary survey of wild *Triticum* and *Aegilops* species in the world's genebanks

271 HOLUBEC, V., HANUŠOVÁ, R. and KOSTKANOVÁ, E.: The Aegilops collection in the Praha-Ruzyně (Czechoslovakia) Gene Bank: collecting, evaluation and documentation

203 HOSSAIN, I. and AZAD, A. K.: Reaction of wheat to *Helminthosporium sativum* in Bangladesh

151 HU, H.: Germplasm enhancement by anther culture in Triticeae

117 INAGAKI, M. N. and TAHIR, M.: Production of haploid wheat through intergeneric crosses

179 IZDEBSKI, R.: Utilization of rye genetic resources — initial material selection

29 JAASKA, V.: Isoenzyme variation in barley (*Hordeum* L.). 2. Aspartate aminotransferase and 6-phosphoglyconate dehydrogenase
21 JACOBSEN, N. and BOTHMER, R. VON: Supraspecific groups in the genus *Hordeum*
301 JARADAT, A. A.: Breeding potential of durum wheat landraces from Jordan. I. Phenotypic diversity
305 JARADAT, A. A.: Breeding potential of durum wheat landraces from Jordan. II. Differential responses to drought
107 JAUHAR, P. P.: Chromosome pairing in hybrids between hexaploid bread wheat and tetraploid crested wheatgrass (*Agropyron cristatum*)
127 JENSEN, K. B. and CHEN, S.-L.: An overview: Systematic relationships of *Elymus* and *Roegneria* (Poaceae)
67 KAKEDA, K. and YAMAGATA, H.: Immunological analysis of chromosome replication in barley, rye, and durum wheat by using an anti-BrdU antibody
43 KELLOGG, E. A.: Restriction site variation in the chloroplast genomes of the monogenomic Triticeae
285 KISON, H.-U. and NEUMANN, M.: Hybridization between hexaploid triticale and *Triticum monococcum* L. I. Progamic reaction
187 KOBA, T. and SHIMADA, T.: Variations in the crossability of common wheat cultivars with cultivated barley
323 KOCIUBA, W.: Assessment of agriculturally important features of winter and spring triticale collections (× *Triticosecale* Wittmack)
233 LAFIANDRA, D., MASCI, S., D'OVIDIO, R., TANZARELLA, O. A., PORCEDDU, E. and MARGIOTTA, B.: Relationship between the D genome of hexaploid wheats (AABBDD) and *Ae. squarrosa* as deduced by seed storage proteins and molecular marker analyses
111 LINDE-LAURSEN, I., BOTHMER, R. VON and JACOBSEN, N.: Relationships in the genus *Hordeum*: Giemsa C-banded karyotypes
121 LU, B.-R. and SALOMON, B.: Differentiation of the SY genomes in Asiatic *Elymus*
277 MERKER, A.: The Triticeae in cereal breeding
87 MOLNAR, S. J., WHEATCROFT, R. and FEDAK, G.: RFLP analysis of *Hordeum* species relationships
263 MURAMATSU, M., TAMURA, N., UNO, H., KUIOI, N., KUDO, T., SHIOTA, S., YAMAGUCHI, M., OHE, K., HIJIYA, K., TSUTSUMI, H., SORAI, M., KASHINO, N., OHTA, T. and VU, T. T.: Cross-compatibility of Triticeae species indigenous to Japan and cytogenetics of F_1 hybrids
219 NARANJO, T.: The use of homoeologous pairing in the identification of homoeologous relationships in Triticeae
291 NEUMANN, M. and KISON, H.-U.: Hybridization between hexaploid triticale and *Triticum monococcum* L. II. The F_1 generation A^uA^bBR
295 NIEMEYER, H. M., COPAJA, S. V. and BARRIA, B. N.: The Triticeae as sources of hydroxamic acids, secondary metabolites in wheat conferring resistance against aphids
247 OHTA, S.: Intraspecific hybrid sterility in *Aegilops caudata* L.
311 OMELIANCHUK, N. A., DOBROVOLSKAJA, O. B., KOVAL, S. F. and SHUMNY, V. K.: Plant regeneration from immature embryo-derived calli of wheat isogenic lines
101 PETERSEN, G.: Meiosis of intergeneric hybrids between polyploid species of *Hordeum* and *Secale*
137 PIGNONE, D., GALASSO, I., HAMMER, K. and PERRINO, P.: Cytotaxonomy of *Aegilops fragilis*, a race from southern Italy
257 SCHRADER, O. and SCHMIDT, J.-C.: A new system of transfer of genetic information from *Hordeum* to *Triticum*
281 TARKOWSKI, CZ. and APOLINARSKA, B.: The use of chromosome substitutions and translocations in the breeding of triticale, wheat and rye

213 VERSHININ, A. V., SALINA, E. A. and SVITASHEV, S. K.: Is there a connection between genomic changes and wide hybridization?
207 WAINES, J. G. and BARNHART, D.: Biosystematic research in *Aegilops* and *Triticum*
133 WANG, R. R.-C.: Genome relationships in the perennial Triticeae based on diploid hybrids and beyond
25 YANG, J.-L., YEN, C. and BAUM, B. R.: *Kengyilia*: synopsis and key to species
